victimizing police officers»*

Connie PATRICK Federal Law Enforcement Training Centre (FLECT) USA.

«The benefits of consolidated training - The FLECT model»

And more about ENSP....

About the ENSP

Situated in the countryside near Lyon, the École Nationale Supérieure de la Police is one of France's most prestigious higher education centres, dedicated to training all French senior police officers.

The ENSP also develops specific and cross-sector training activities for public executives and officials involved in the field of security. The college implements specialization courses for managers of local police agencies and of private security services.

Explore Lyon

France's second city, Lyon is renowned both for its architectural heritage and its gastronomy. Listed by UNESCO as a World Heritage site in 1998, Lyon has its roots as a Roman colony founded in 43 BC and the Roman ruins at Fourvière offer breath-taking views of Lyon today. Vieux Lyon – the old city dates back to medieval times and the city also features remarkable 19th century architecture. As a city famed for its excellent food, there are also plenty of local specialities to try, including traditional meats, cheeses and wine. The city is also home to many of France's finest restaurants.

To find out more about the city and its sights, visit the Lyon Tourist Office:

Basilica of Fourvière

About CEPOL

CEPOL is a European Union (EU) Agency, established in 2005. CEPOL's mission is to bring together senior police officers from police forces in Europe - essentially to support the development of a network - and encourage cross-border cooperation in the fight against crime, public security and law and order by organising training activities and research findings.
